

My Packet Radio – Experiment 3

Documentation assembled by Larry Lovell – 31 January 2019

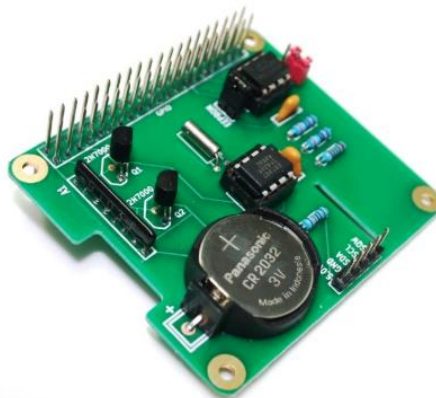

```
sudo apt-get update
sudo apt-get upgrade
sudo apt-get autoremove
```

Parts Used

- 1) Construct the kit or purchase an assembled model: <https://www.tnc-x.com/TNCPi.htm>

- 2) For my project I added a Real Time Clock

3) For my project I added a battery back-up

Options 2 and 3 were not necessary for this operation.

Setup

- 1) First install the operating system and check it out.
- 2) I installed VNC on the Raspberry Pi so that it could be controlled remotely (My Computer Room to my Radio Room)
- 3) Real Time Clock and Battery Back up were installed and checked out but removed until the TNC became operational.
